Summary

As a civil engineer with four years of experience, I'm currently pursuing a full stack web development course at Code Institute in the UK to pivot my career into software development. My strong problem-solving and analytical skills, combined with my passion for learning new programming languages and technologies, make me an ideal candidate for software development roles. With my unique perspective gained from my background in civil engineering, I'm confident in my ability to contribute to any team and add value to projects. Let's connect and explore how I can help your organization!
